

Workshops

The manufacturing processes and operation of various equipment, spare parts, and others typical of the complex technology of large dimensions.

Workshop production

Conducting education and training for students on the various machines and manufacturing various types of scientific research

Education Workshop

The manufacturing operations of equipment and metal in addition to the functions of education and training

Workshop welding and blacksmithing

Manufactures various products, galvanized sheet iron in addition to the tasks of training and education

Plumbing Workshop

The foundry casting processing of various types of castings from cast iron, aluminum, copper, etc. In addition to the tasks of training and education

Foundry

Finishing and softening the surfaces of micro-products in addition to the tasks of training and education

Grinding workshop

The processing and assembling the component parts of machines and parts manufactured in workshops and other functions in addition to training and education

Albarad Workshop

Manufacture and operation of services of small dimensions, which need high accuracy in addition to the tasks of training and education

Precision equipment Workshop

Manufactures all types of furniture and wood products in addition to the functions of the various training and education

Carpentry workshop

The paint out of the products of different workshops and non-metal mineral in addition to the tasks of training and education

Painting workshop

In the process of metal plating and resurfacing as well as to the functions of training and education

Metal plating Workshop

Carry out maintenance and repair of all the different electrical machines and equipment in addition to the tasks of training and education

Electricity Workshop

There are a series of workshops and laboratories attached to which contains a variety of testing equipment for accurate and conduct the necessary tests on different products to ensure product quality, such as laboratories and laboratory measurements of sand and plant functions as well as training and education
