Production Management-Test Bank

1) Productivity tends to be more difficult to improve in the service sector because the

work is:

A) Often difficul	t to automate	C)	Frequently processed individually
B) Typically laborates	or-intensive	,	All of the above make service productivity more difficult
for each house	e it cleans. After some quality s use of chemicals by 50%.	com	of labor, and \$5 of misc. expenses plaints, the company has decided what percentage has multifactor
A) 0%		C)	25%
B) 8.3%		D)	50%
3) A strategy is a	(n):		
A) Set of marketplace	f opportunities in the	C	Simulation used to test various product line options
B) Broad	statement of purpose		Action plan to achieve the mission
4) Which of the f	ollowing are the primary func	ions	of all organizations?
A) Production/ marketing,	operations, and human resources	C	Sales, quality control, and production/operations
B) Marketing, finance/acc	human resources, and ounting	D	Marketing, production/operations, and finance/accounting
5) Which of the f	following is the best example of	com	peting on low-cost leadership?
	duces its product with naterial waste than its s do	C)	A firm's products are introduced into the market faster than its competitors' products are
,	offers more reliable nan its competitors do	D)	A firm's research and development department generates many ideas for new products
6) What is a glob goods and serv		and :	activities that supply a firm with
A) Supply tree		C)	Supply chain
B) Provider net	work	D)	Vendor network

7)	Advantages of	outsourcing	do	NOT	include:
------------	---------------	-------------	----	-----	----------

- A) Cost savings
- B) Gaining outside expertise

- C) Marinating a focus on core competencies
- D) Potential creation of future competition
- 8) An operations manager is performing a factor-rating analysis to help him choose an outsourcing provider. He is focusing on two factors: A and B, using a weight of 75% for factor A and 25% for factor B. He has scored five different potential providers on both factors, using a scale of 1-5, with 1 representing the BEST score. Based on the scores provided in the table below, which provider should be chosen?

Provider	Factor A	Factor B
Alpha	1	5
Beta	3	3
Gamma	4	1
Phi	2	1
Omega	3	5

- A) Alpha
- B) Beta

- C) Gamma
- D) Phi

9) Which of the following is NOT a strategic operations management decision?

- A) Maintenance
- B) Price

- C) Layout design
- D) Quality

10) Which of the following statements concerning CPM activities is false?

- A) The early finish of an activity is the early start of that activity plus its duration
- B) The late finish is the earliest of the late start times of all successor activities
- C) The late start of an activity is its late finish less its duration.
- D) The late finish of an activity is the earliest late start of all preceding activities

11) The critical path for the network activities shown below is _____ with duration

		Immediate
Activity	Duration	Predecessors
Α	2	
В	4	
С	6	A,B
D	1	A,B
Е	2	B,C,D

A) A-D-E; 5

B) B-E; 6

C) B-D-E; 7

D) B-C-E; 12

12) Which is NOT true regarding differences between goods and services?

A) Tangible goods are generally produced and consumed simultaneously; services are not.

B) Most goods are common to many customers; services are often unique to the final customer.

C) Services tend to have a more inconsistent product definition than goods

D) Services tend to have higher customer interaction than goods

13) Gibson Valves produces cast bronze valves on an assembly line, currently producing 1600 valves each 8-hour shift. If the productivity is increased by 10%, it would then be:

A) 180 valves/hr.

C) 220 valves/hr.

B) 200 valves/hr.

D) 880 valves/hr.

14) Which time-series model uses BOTH past forecasts and past demand data to generate a new forecast?

A) Naive

C) Weighted moving average

B) Moving average

D) Exponential smoothing

15) Productivity measurement is complicated by:

A) the competition's output

C) Stable quality

B) the fact that precise units of measure are often unavailable

D) The workforce size

16)	What is the forecast for May based on a weighted moving average applied to	the
1	following past demand data and using the weights: 4, 3, 2 (largest weight is	for
1	most recent data)?	

Nov.	Dec.	Jan.	Feb.	Mar.	April
37	36	40	42	47	43

A)	44.1	

B) 43.2

C) 42.5

D) 44.5

17) Given an actual demand this period of 61, a forecast for this period of 58, and an alpha of 0.3, what would the forecast for the next period be using exponential smoothing?

A) 45.5

C) 58.9

B) 57.1

D) 61.0

18) The total of all outputs produced by the transformation process divided by the total of the inputs is:

A) Utilization

B) Greater in manufacturing than in services

C) Defined only for manufacturing firms.

D) Multifactor productivity

19) A time-series trend equation is 25.3 + 2.1x. What is your forecast for period 7?

A) 23.2

C) 27.4

B) 25.3

D) 40.0

20) Which of the following is TRUE regarding computer-aided design?

A) It is too expensive to use in most manufacturing and design settings

C) It results in longer development cycles for virtually all products

B) It is an obsolete technology

D) It is the use of computers to interactively design products and prepare engineering documentation

21) Who was the person most responsible for popularizing interchangeable parts in manufacturing?

A) Frederick Taylor

C) Eli Whitney

B) Henry Ford

D) Whitney Houston

${f 22})$ 3-D printing has proven to be particularly	y advantageous for:		
A) Prototype development and	C) Quality function deployment		
custom products	D) Robust design		
B) Modular design			
23) The "Father of Scientific Management" is	s:		
A) Henry Ford	C) W. Edwards Deming		
B) Frederick W. Taylor	D) Frank Gilbreth		
24) Productivity can be improved by:			
A) Increasing inputs while holding outputs steady	C) Increasing inputs and outputs in the same proportion		
B) Decreasing outputs while holding inputs steady	D) Decreasing inputs while holding outputs steady		
25) Henry Ford is noted for his contributions	to:		
A) Time and motion studies.	C) Assembly line operations.		
B) Statistical quality control.	D) Scientific management.		
26) Three commonly used productivity varial	bles are:		
A) Quality, external elements, and precise units of measure.	C) Technology, raw materials, and labor.		
B) Labor, capital, and management.	D) Education, diet, and social overhead.		
27) The marketing function is concerned with	:		
A) producing goods or providing services.	C) building and maintaining a positive image.		
B) procuring materials, supplies, and equipment.	D) generating the demand for the organization's products or services.		
28) Which of the following influences layout of	lesign?		
A) inventory requirements	C) personnel levels		
B) capacity needs	D) All of the above influence layout decisions		

29) Which productivity variable has the great	test potential to increase productivity?
A) labor	C) management
B) globalization	D) capital
30) Which of the following is NOT true when lower in the service sector than in the man	
A) Services are typically labor-intensive.	C) Services are often an intellectual task performed by professionals.
B) Services are often difficult to evaluate for quality.	D) Service operations are typically capital intensive.
31) A business's stakeholders, whose conflict dilemmas, include:	ing perspectives cause ethical and social
A) lenders.	C) owners.
B) suppliers.	D) all of the above.
32) The purchasing function is concerned with	h:
A) producing goods or providing services.	C) building and maintaining a positive image.
B) procuring materials, supplies, and equipment.	D) generating the demand for the organization's products or services.
33) The finance function is concerned with:	
A) producing goods or providing services.	C) building and maintaining a positive image.
B) procuring materials, supplies, and equipment.	D) securing monetary resources.
34) Which of the following is one of the decisions?	e 10 strategic operations management
A) depreciation policy for tax	C) process and capacity design
returns	D) pricing
B) advertising	
35) Who among the following is associated operations management?	with contributions to quality control in
A) Charles Babbage	C) Frank Gilbreth
B) Henry Ford	D) W. Edwards Deming

A) intangible product B) easy to store C) customer interaction is high D) simultaneous production consumption 37) Which of the following is a similarity between goods and services? A) mass production B) consistency D) Both have quality standards. 38) Which of the following is NOT among the ethical and social challenges fare operations managers? A) honoring stakeholder C) efficiently developing commitments producing safe high-quality g B) training, retaining, and motivating employees D) increasing executive pay 39) An operations manager is NOT likely to be involved in: A) The design of goods and services to satisfy customers' wants wants and needs.	ring and
and services? A) mass production B) consistency C) automation D) Both have quality standards. 38) Which of the following is NOT among the ethical and social challenges fare operations managers? A) honoring stakeholder commitments B) training, retaining, and motivating employees C) efficiently developing producing safe high-quality groducing safe high-quality groducts D) increasing executive pay 39) An operations manager is NOT likely to be involved in: A) The design of goods and services to satisfy customers' wants wants and needs.	ring and
A) mass production B) consistency D) Both have quality standards. 38) Which of the following is NOT among the ethical and social challenges far operations managers? A) honoring stakeholder commitments B) training, retaining, and motivating employees D) increasing executive pay 39) An operations manager is NOT likely to be involved in: A) The design of goods and services to satisfy customers' wants C) automation D) Both have quality standards. C) efficiently developing producing safe high-quality generations are producted in: C) The identification of custom wants and needs.	and
B) consistency D) Both have quality standards. 38) Which of the following is NOT among the ethical and social challenges far operations managers? A) honoring stakeholder C) efficiently developing producing safe high-quality g producing safe high-quality g products B) training, retaining, and motivating employees D) increasing executive pay 39) An operations manager is NOT likely to be involved in: A) The design of goods and control of custom services to satisfy customers' wants wants and needs.	and
38) Which of the following is NOT among the ethical and social challenges far operations managers? A) honoring stakeholder C) efficiently developing producing safe high-quality g producing safe high-quality g products B) training, retaining, and motivating employees D) increasing executive pay 39) An operations manager is NOT likely to be involved in: A) The design of goods and services to satisfy customers' wants wants and needs.	and
A) honoring stakeholder C) efficiently developing commitments producing safe high-quality g B) training, retaining, and motivating employees D) increasing executive pay 39) An operations manager is NOT likely to be involved in: A) The design of goods and services to satisfy customers' wants wants and needs.	and
commitments producing safe high-quality g B) training, retaining, and motivating employees D) increasing executive pay 39) An operations manager is NOT likely to be involved in: A) The design of goods and services to satisfy customers' wants wants and needs.	
motivating employees D) increasing executive pay 39) An operations manager is NOT likely to be involved in: A) The design of goods and services to satisfy customers' wants wants and needs.	
A) The design of goods and services to satisfy customers' wants wants and needs.	
and needs. B) The quality of goods and services to satisfy customers' wants and needs. D) Work scheduling to meet due dates promised to customers' wants	the
40) Budgeting, recruiting, and scheduling are examples of a:	
A) Development. C) Operation Strategic decision	i.
B) Core process. D) System.	
41) Operations management is part of a production system that can be describe the following manner: Organization: inputs—processes—outputs.	l in
Which one of the following correctly describes a production system?	
A) Airline: C) Furniture manufacture pilots→planes→transportation wood→sanding→chair B) Bank: D) Telephone computellers→computerequipment→dep satellites→cables→communication	ıny:

42) Manufacturing processes usually	y have:
A) physical, durable output.B) high levels of customer contact	C) output that cannot be inventoried.
b) mgm levels of eastorner contact	D) low levels of capital intensity.
43) Which of the following is NOT decisions?	one of the 10 strategic operations management
A) layout strategy	C) process and capacity design
B) maintenance	D) mass customization
44) Which of the following attribute	es is most typical of a service?
A) production and consumption	on C) mass production
occur simultaneously	D) consistency
B) tangible	
45) The service sector has lower prosector because:	oductivity improvements than the manufacturing
A) the service sector uses less skilled labor that	· · · · · · · · · · · · · · · · · · ·
manufacturing.	D) service sector productivity is
B) the quality of output is lower is services than manufacturing	
	ividuals with a vested interest in an organization suppliers, owners, lenders, employees, and
A) alumni	C) vestors
B) investors	D) stakeholders
47) An operations task performed a	t Hard Rock Café is:
A) borrowing funds to build a new restau	rant.
B) advertising changes in the restaurant m	nenu.
C) calculating restaurant profit and loss.	
D) preparing employee schedules.	
48) Which of the following would I bank?	NOT be an operations function in a commercial
A) auditing	C) maintenance
B) teller scheduling	D) collection

49) Managing quality as one of the operation management strategic decisions includes:

- A) Determine the customer's quality expectations
- B) Establish policies and procedures to identify and achieve that quality
- C) A and B
- D) Determine the limits of cost, quality and human resources required

50) "Considers inventory ordering and holding decisions" is within the strategic operations management decision area of:

- A) Inventory management
- B) Managing quality

- C) Process and capacity strategy
- D) Design of goods and services
